

AGMOR FEED FLAVORS

AGMOR FLAVORS are designed to enhance the consumption of feeds for all types of livestock, and pets. Our research and development has proven these flavor additives are the best your money can buy. Our highly qualified staff of experienced professionals create, develop, and test our flavors on a continual basis to assure you get the quality, and performance results you expect from a top line of flavors. **AGMOR FLAVORS** are the very best in the industry and represent the Brookside Label as another quality product.

PRODUCTS

AGMOR ALL FLAVOR EXTRA is a sweet tasting supplement containing vanilla, maple, anise, other natural and artificial flavors, which helps improve acceptance of all types of animal feeds. It may be used in calf and pig starters making feeds more acceptable and palatable. This product blends well with all ingredients and is available as a liquid or dry product form.

AGMOR SWEET FLAVOR / PIGS is designed specifically for pig starter rations. The product was developed to attract nursing pigs to dry feed, at the same time, promote regular intake of feed needed for successful early weaning programs. It combines the sweet flavor pigs prefer plus rum, maple, and other natural and artificial flavors, and sweeteners, with other highly acceptable flavors and aromas to make it a very effective additive for pig starters and pre starters.

AGMOR SPECIAL SOW LAC is a flavor formulated specifically for pig starter rations containing a blend of caramel, vanilla, and other natural and artificial flavors and sweeteners. It attracts early weaned pigs to dry feed, at the same time promote constant intake for successful early weaning programs. The product offers an easy way to improve palatability and increase feed consumption of starter rations. It has an appealing natural aroma and taste to maintain uniform consumption.

AGMOR BERRY CONCENTRATE, is a fruit flavored supplement blended with berry, vanilla, and other natural and artificial flavors and sweeteners to improve acceptance of all animal feeds for dairy, beef, horses, swine, and sheep. It is a deluxe berry flavored alternative to standard sweeteners and blends well with all types of feed.

AGMOR DAIRY FLAVOR provides a very uniform, fresh grain flavor for dairy rations and contains citrus oils, vanilla, ethyl butyrate, and natural and artificial sweeteners and flavors. It helps maintain regular feed consumption and has shown that dairy herds consuming feeds with the additive do a better job of cleaning up fines. An important note, this additive covers up the bitterness of urea and gives more uniform feed consumption.

AGMOR ANISE FLAVOR 2X is a sweet tasting supplement used as an enhancer for better consumption of feeds by dairy and beef cattle, swine, and sheep. It contains anise, anethol, and natural and artificial flavors, and is available as a dry or liquid form. The liquid form contains vegetable oil, anethol, and other flavor additives.

AGMOR HORSE FLAVOR EXTRA is a taste enhancer designed for horse and pony rations which they can't resist. The consistent strong enhancing flavor allows for a wide variation in ration ingredients. The product contains apple, cinnamon, and other natural and artificial flavors, and is available as a dry product.

AGMOR SWEET SPECIAL is an extra sweet tasting supplement used to enhance the flavor of all animal feeds. It is an inexpensive alternative to standard sweeteners and contains a select blend of rum, maple, anise, and other natural and artificial flavors and sweeteners.

AGMOR SUPER APPLE FLAVOR is a very fresh tasting supplement used for horse feeds and deer blocks. It is made from a special apple concentrate along with other natural and artificial flavors.

Detailed Product Specification Sheets are available upon request for each product. We will private label these products or manufacture special requested products to your specifications.

WHEN TO USE FEED FLAVORS

A. Increase Feed Consumption

Whether your production units contain swine, dairy, beef, or pets, success is based on feed consumption and converting that feed to profitable units. If you desire sweet or other flavors, we can fulfill your needs with BROOKSIDE AGMOR FLAVORS.

B. Off Flavored Ingredients

Many of today's ingredients do not lend their flavor to good feed consumption. Off flavored or low quality grains can reduce feed consumption. BROOKSIDE AGMOR FLAVORS can help improve feed consumption.

C. Customer Preference

Many consumers expect a final product that has an appealing flavor and or aroma which their animals will eat. You can fill those needs with BROOKSIDE AGMOR FLAVORS.

D. Product Identification

Many manufacturers add a specific flavor to identify their product. BROOKSIDE AGMOR FLAVORS will give you great product identification.

E. Starter Rations

Research tests have shown younger animals will consume dry feeds at an earlier age when BROOKSIDE AGMOR FLAVORS are added to their early feed rations.

F. Marketing Tools

As stated before, many customers demand feeds having extra flavor. Adding BROOKSIDE AGMOR FLAVORS to your regular line will serve as a good marketing tool and product identification for your sales people.

G. Formula Flexibility

BROOKSIDE AGMOR FLAVORS are added at low inclusion rates and leave room for other important ingredients in your formula.
